Latin American Technology Platforms on Future Internet and ICT Components

Dr Julián Seseña, ROSE Vision

Poznan, 25th October 2011
Future Internet Assembly (FIA)
Strategic research agendas on potential areas for cooperation on sector basis (according to ETPs)

NEM, Net!Works, ISI, NESSI, EPOSS, ENIAC, ARTEMIS have been considered as a potential area for cooperation in some of the target countries, and therefore these LATPs will include a WG focused on specific ETPs focus.
One Future Internet Technology Platform per country is sustained by different TWGs (Thematic Working Groups inspired on ETPs) focused on those areas in which potential for cooperation and critical mass are identified.

TWGs are the counterparts of ETPs at National level… National Initiatives.
FI cooperation between Europe and Latin America – AFTER “FIRST”

Clear counterparts at regional and national levels
Roadmaps and research priorities identified
